Abstract :

Information is felt more and more important especially in the submission of reports on topical matters in an organization or company. For a company like BNI Card Center, which continues to grow, reporting information pendistribusian credit card application form an effective and efficient are needed. Scientific writing is carried out through field research and direct interviews with the Card Center. Seeing the need for information by parties Card Center, then designed a new system of distributing reports. Hopefully, through this new system will assist the Branch Services Unit to resolve the problem of information delays.

Based on research that has been done, the writer suggested that the data processing, especially in the distribution report FAKK use such computerized using Microsoft Access as the attached program design. This will assist the Branch Services Unit in providing information to the leadership more quickly and accurately.
